

Tornado I

2" - 4"
51mm - 102mm

Description

The Tornado I cleans small diameter pipelines in crude oil gathering systems and is very effective in increasing flow rates. The unique cup design permits this pig to travel through short radius bends.

Features

- Solid Cast urethane.
- Light weight.
- Easily cleaned and reused.
- Available in different durometers.

Tornado II

2" - 4"
51mm - 102mm

Description

This Solid Cast urethane pig is an excellent cleaner for small diameters pipelines. The discs on this pig allow this pig to traverse any line with maximum efficiency.

Features

- Solid Cast urethane.
- Light weight.
- Reusable.

Options

- Wire wheel brushes.
- Gauging plates.
- Variety of durometers available.

Tornado III

2" - 4"
51mm - 102mm

Description

The Tornado III has a cup/disc combination for maximum cleaning of small diameter lines. Its cup design permits this pig to be launched with a low differential pressure.

Features

- Solid Cast urethane.
- Light weight.
- Available in different durometers.

Tornado IV

2" - 8"
51mm - 203mm

Description

This one piece urethane cup pig is light weight and has the ability to traverse 1.5D bends and non-concentric pipes. The strategic placement of the cups allows the pig to easily pass by tees and full opening valves. The flexible pig body expands with pressure to further enhance sealing.

Features

- All urethane construction.
- Light weight.
- Variety of durometers available.
