

For quick, permanent
repair of small holes
in steel pipe

Style 118 HandiBand Clamp

The Dresser® Style 118 HandiBand Clamp is a field-proven, low cost band-type repair clamp for quick repair of small leaks and holes in steel gas piping. Installation is fast, easy and foolproof. Simply wrap the clamp around the pipe, drop the boltheads through the slotted lugs and tighten the nuts. Compression of the large size gasket seals the leak completely and permanently.

Individual components of the Style 118 clamp are carefully engineered and constructed with lugs of ductile iron and bolts plated for long-life and durability. The HandiBand clamp is made of stainless steel for corrosion resistance. The Dresser Grade 304 rubber compound gasket offers resistance to oil, aromatic and aliphatic hydrocarbons, condensates, gasoline and natural gas. These gaskets retain their resilience for the life of the line.

Materials of Construction

Band: Stainless Steel 18-8, Type 304
Lugs: Ductile Iron ASTM 536
Bolts & Nuts: Alloy to ANSI A21.11
Gasket: Gridded to Dresser Specs

Style 118 HandiBand
